OVERVIEW

Background and Regulatory Guidance

The Basel Committee on Banking Supervision (BCBS) set a global standard for the prudential regulation of banks and aim to improve the quality of banking supervision worldwide. The EU's Capital Requirements Directives (CRD) and Capital Requirements Regulations (CRR) implement the policy standards of Basel requirements for European financial institutions. These rules are frequently reviewed and updated to ensure the greatest safety for financial institutions, more recently leading to the development of CRR II (Regulation (EU) 2019/876) and CRD V (Directive (EU) 2019/878). The CRR and CRD rules are enforced in the UK, together with local implementing rules and guidance, by the Prudential Regulation Authority (PRA).

The UK's membership of the EU came to an end on 31 January 2020. The PRA has on-shored CRR with effect from 1 January 2021 via published final versions of EU Exit Instruments to ensure a legal UK framework is in place.

To ensure the safety of bank capital, Basel introduced a framework of three pillars. Pillar 1 sets out the minimum capital requirements firms are required to meet for credit, market and operational risk. Under Pillar 2, firms and supervisors assess internal capital adequacy and take a view on whether a firm should hold additional capital against risks not adequately covered in Pillar 1. Pillar 3 aims to encourage market discipline by developing a set of disclosure requirements which allows market participants to assess key pieces of information on a firm's capital, risk exposures, risk assessment processes and remuneration approach.

These three pillars were further enhanced by the aforementioned CRR II and CRD V after they were first journalled by the EU in June 2019. These rules were developed to follow a phased implementation throughout 2020 and 2021. In response to the COVID-19 pandemic, some rules were expedited, and others pushed back. In accordance with the EU (Withdrawal Agreement) Act, these CRR 'Quick Fix' measures apply directly to PRA regulated firms as well. Whilst the exact implementation of these rules varies between the UK and the rest of the EU, the main rules do remain consistent.

Future Regulatory Developments

In November 2020 the PRA, FCA and HM Treasury (HMT) issued a joint statement announcing the delay of the UK's version of CRR II enhanced reporting from June 2021 to January 2022. Significant changes being implemented include enhancement to Net Stable Funding Ratio (NSFR) requirements, leverage ratio requirements and a Standardized Approach for Counterparty Credit Risk. In October 2021, the PRA finalised their approach to Basel standards through Policy Statement 22/21. These regulatory changes started to be implemented by the PRA from 1 January 2022. As per the EU Commission Implementing Decision (2021/1753) of 1 October 2021, the UK has not currently been granted EU member state equivalence post Brexit. This has caused minor divergence between Triodos Bank UK Limited (hereafter 'Triodos Bank UK' or 'the Bank') and Triodos Bank Group (hereafter 'Triodos Bank') in the way some assets are risk weighted. For example, as per CRR II changes in Article 107.3, a third country credit institution shall be treated as exposures to an institution only where the third party prudential and supervisory requirements are at least equivalent to those applied in the Union. At Triodos Bank level, exposures to UK credit institutions are treated as Corporates, until such time as equivalence is granted.

Purpose, Basis and Frequency of Disclosure

This document complies with the Pillar 3 disclosure requirements set out in Part Eight of the CRR and the PRA Rulebook. It provides background information on the approach used by Triodos Bank UK to manage risk and maintain its capital resources. It sets out the Bank's:

- Approach to risk management
- Governance structure
- Asset information and capital resources; and
- Compliance with EU and PRA capital requirements regulations

The basis of these disclosures may differ from similar information in the Annual Report & Accounts prepared in accordance with EU International Financial Reporting Standards (IFRS); therefore, the information in these disclosures may not be directly comparable with that information.

The following sets out the Bank's disclosures including the information to be disclosed, frequency, location and verification.

Information to be disclosed: The Bank's policy is to meet all required Pillar 3 disclosure requirements as detailed in Part Eight of the Capital Requirements Regulations.

Frequency: The Bank's policy is to publish the disclosures on an annual basis in conjunction with the publication of the Annual Report and Accounts, which should be read jointly with this document. The European Banking Authority (EBA) has issued guidelines on disclosure frequency and the Bank considers that, given its size and complexity, Pillar 3 disclosures do not need to be made more frequently than annually in the absence of a material change in circumstances.

Medium and location of publication: The Bank's Pillar 3 disclosure is published on the Bank's corporate website <https://www.triodos.co.uk>.

Verification: These disclosures have been subject to internal review and validation by the Bank's Audit and Risk Committee (ARC) prior to being submitted to the Board for approval. These disclosures have not been, and are not required to be, subject to independent external audit, and do not constitute any part of the Bank's audited financial statements.

Non-material, proprietary or confidential information: This document has been prepared to meet the Pillar 3 disclosure requirements set out in CRR. The Bank does not seek any exemption from disclosure on the basis of materiality, proprietary or confidential information, unless specifically stated in the document.

Scope of Disclosure

The Bank is a UK registered Bank authorised by the Prudential Regulation Authority (PRA) and regulated by the PRA and Financial Conduct Authority (FCA). The Bank trades as a 100% owned UK subsidiary of Triodos Bank and has no trading subsidiaries. The information disclosed in this document relates to Triodos Bank UK unless stated otherwise.

RISK MANAGEMENT OBJECTIVES AND POLICIES

Risk management objective

The risk management objective for Triodos Bank UK is to create an environment within which it can pursue its mission within risk appetite in a sustainable, prudent way to its fullest extent. This is supported by its Risk Management Framework (RMF).

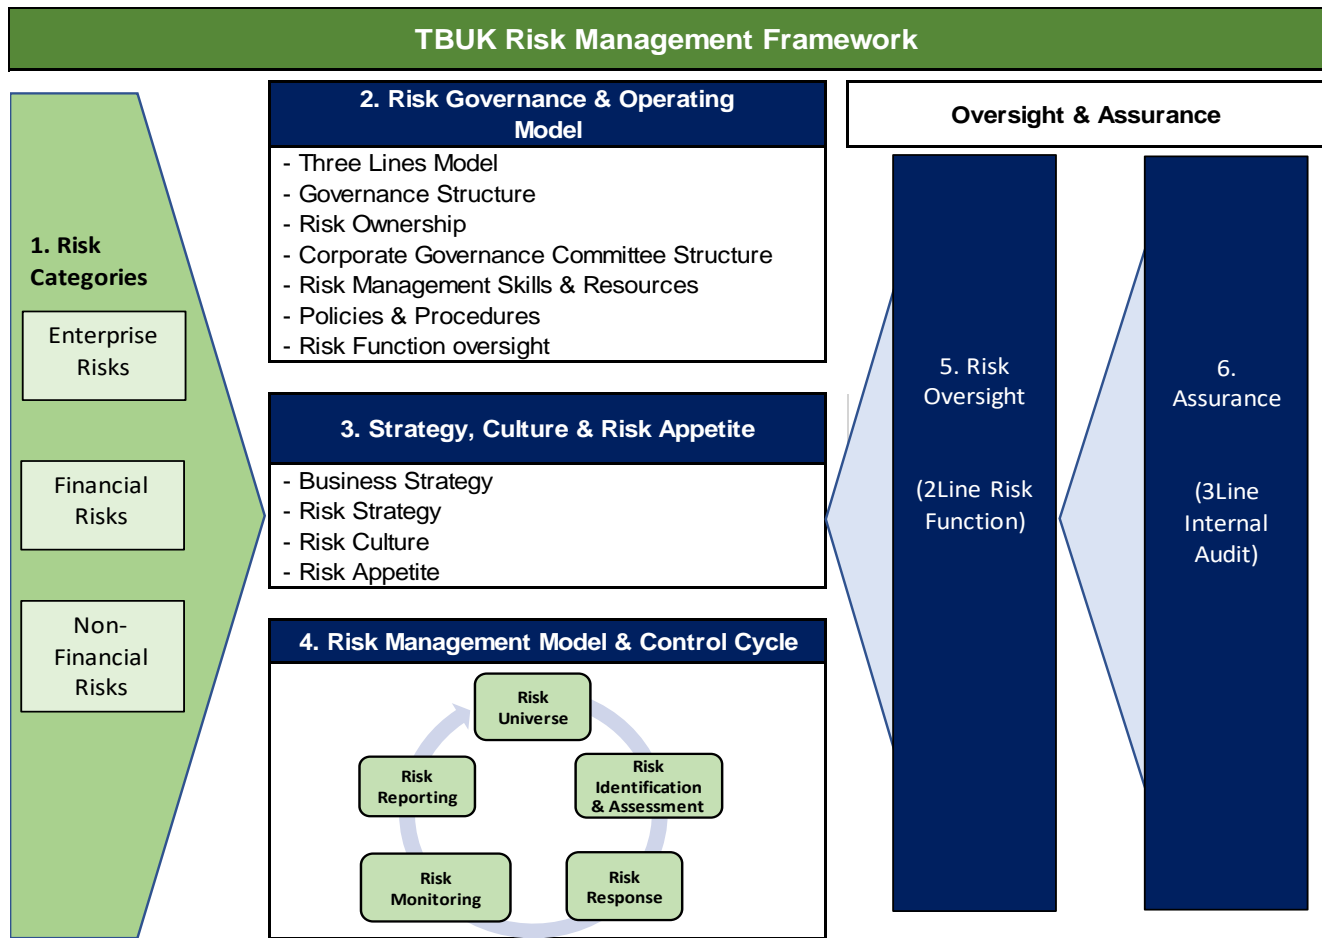

The RMF articulates the risk management strategy, governance, approach, and control framework that identifies, assesses, responds, monitors, and reports on risk exposures faced by the Bank. It is owned operationally by the Chief Risk Officer (CRO) and approved by the Audit and Risk Committee (ARC).

Triodos Bank UK's RMF seeks to align to the Triodos Bank Group Risk Management Framework. However, it also reflects the UK regulatory environment where necessary, as guided and approved by the ARC.

The Board sets clear risk appetite statements, driven in conjunction with the 3-year strategic planning process, and both inputs support the Bank's approach to risk management. The CRO also undertakes an annual review that seeks to confirm that Triodos Bank UK's RMF remains fit for purpose in the period in between.

The core components of the Bank's RMF are summarised below in Figure 1.

Figure 1: Enterprise Risk Management Framework

Three Lines Model

An industry-standard Three Lines model is incorporated in the RMF and applied within Triodos Bank UK to provide clarity of responsibilities based on an appropriate segregation of duties across each line. Operating in such a way allows each function to understand the boundaries of its responsibilities and how they fit into the internal control and risk management system. Application of this model provides a structure for periodic Risk and Internal Audit assurance activity around the RMF.

Primary responsibilities across the 3Lines model are summarised in the diagram below:

Figure 2: Three Lines Model

Governance Structure

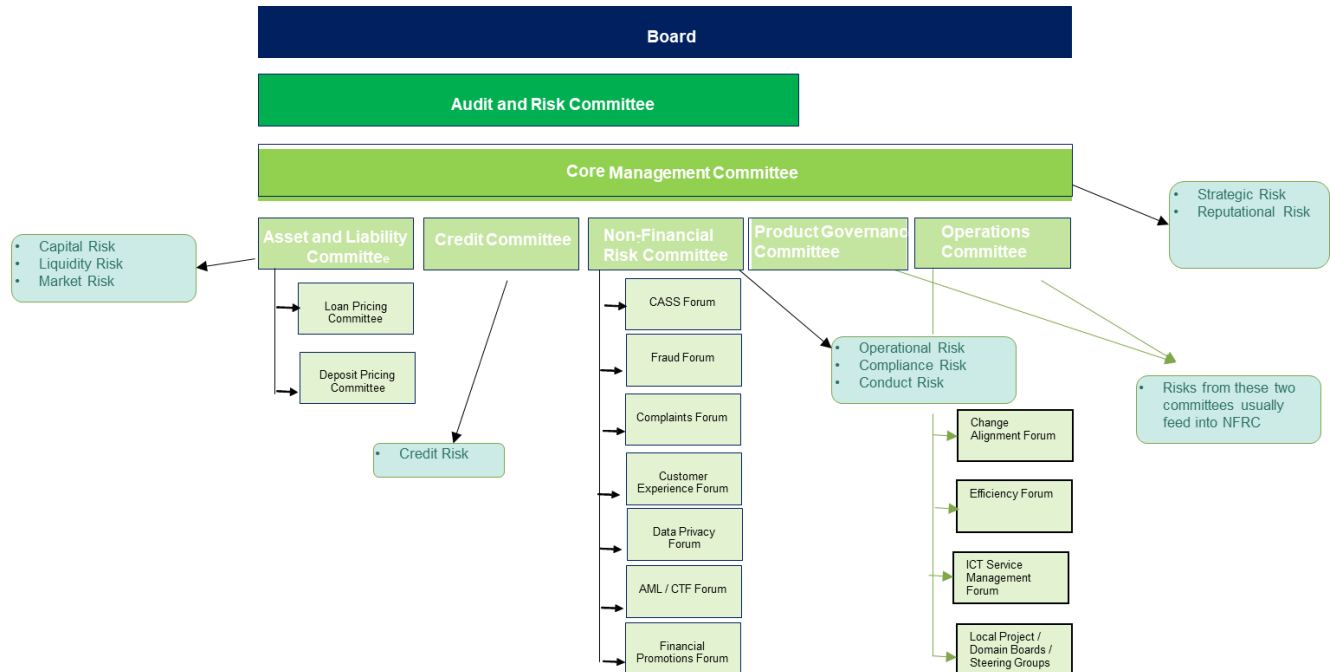

The Bank's Risk Governance is supported through the Corporate Governance Committee structure and designed considering the Three Lines model. A summary of the Corporate Governance Committee structure, and details of each Committee's primary duties, authority, and membership, is included below.

The Risk Governance Committee structure seeks to ensure that the Bank has a clear organisational structure in place with: well defined, transparent and consistent lines of responsibility; effective processes to identify, manage, monitor and report the risks inherent in operations; and robust internal controls. The Committee arrangements are designed to be proportionate to the nature, scale and complexity of the business model and the risks the Bank is exposed to.

The members of the **Board** are collectively responsible for the long-term success of the bank and provide oversight and challenge across all Three Lines of Defence (LOD). Key risk management responsibilities of the Board include setting business and risk strategy, defining and overseeing risk appetite, and monitoring the risk profile of the Bank. There are clearly defined escalation and reporting routes that ensure the information flows through the Risk Governance Committee structure to ultimately provide the Board with assurance on the effectiveness of the Bank's risk management practices. The Board may delegate certain matters to the Audit and Risk Committee (ARC) however the Board remains ultimately accountable for the fulfilment of responsibilities.

A summary of the Risk Governance Committee structure is outlined in Figure 3.

Figure 3: Triodos Bank UK Board, Audit & Risk and Core Management Committee Structure

Details of Board members, Board meetings, recruitment and diversity strategy can be found on Page 22 of the Annual Report & Accounts.

The **Audit and Risk Committee (ARC)** is responsible for assisting the Board in fulfilling its oversight responsibilities and advising the Board on the current risk exposures and future risk strategy, and the embedding and maintenance of a supportive risk culture across the company in performing its duties.

ARC monitors the integrity of the financial statements of the company; keeps under review the adequacy and effectiveness of the company's internal financial controls and internal control and risk management systems; and oversees the Internal and External Audit functions. ARC also maintains effective working relationships with the Board, the Bank's management and the external auditors.

The **Core Management Committee (CMC)** has been established to enable the Chief Executive Officer (CEO) to discharge his/her duties. Reporting into the CMC are the Tier 1 committees: Credit Committee; Asset and Liability Committee; Non-Financial Risk Committee; Product Governance Committee; and Operations Committee. The CMC assists the CEO in the performance of his/hers duties within the bounds of their authority. Members include the CEO, Chief Financial Officer (CFO), Chief Operating Officer (COO), CRO, Head of Business Banking (HoBB) and Head of Retail Banking (HoRB). The Head of Internal Audit attends upon request.

The CMC is responsible for the oversight of all risks, with primary responsibility for strategic and reputational risks.

The purpose of the **Asset and Liability Committee (ALCo)** is to monitor development of the balance sheet (including off-balance sheet positions) of the Bank in order to determine whether capital, market and liquidity risks are and will be within the defined Risk Appetite. The ALCo sets the desired balance sheet risk positions (within the defined Risk Appetite) to optimise the risk return trade off.

The purpose of the **Loan Pricing Committee (LPC)** is to manage pricing (interest rates, fees and charges) of the Bank's Loan range of products.

The purpose of the **Retail Pricing Committee (RPC)** is to manage the pricing (interest rates, fees and charges) of the Bank's Retail Deposit range of products.

The **Credit Committee (CC)** is responsible for setting, assessing, measuring, and monitoring the management of the credit risk portfolio, at portfolio and individual loan level, in line with the defined credit risk appetite. It takes decisions on loans that have an increased impact on the bank's balance sheet and assesses the alignment of loans with the Bank's credit risk policies.

The **Non-Financial Risk Committee (NFRC)** monitors and challenges the development of the non-financial risk profile of the Bank to determine whether operational, conduct and compliance risks are and will be in line with the defined non-financial risk appetite.

The **Product Governance Committee (PGC)** is responsible for a well-functioning product approval and review process, including approval of new and existing products. The PGC will make decisions in accordance with agreed mandates. The PGC will make recommendations to the CMC as appropriate on matters outside of agreed mandates and will escalate medium and high risks to NFRC, or any other appropriate governance body.

The **Operations Committee (OC)** has been established to take decisions on issues and risks relating to operational (customer) services, office and IT services, vendor management, change management, business continuity, HR operations and information security. The OC is responsible for the oversight and monitoring of the day-to-day operational areas of the Bank and will recommend to the CMC operational outcomes aligning to the Bank's mission and business strategy.

The Bank operates in accordance with the context, strategy and founding principles of Triodos Bank Group and applies Group policies, including the Triodos Internal Regulations (TIR), amending and adopting them as is suitable for local business. This alignment with Group takes place through regularly scheduled discussions between Group COO and Bank Chairman, between Group COO and Bank CEO, and between Group CRO and Bank CRO.

Governance Committees are allocated responsibility for monitoring and ensuring appropriate management within risk appetite of specific risk types. The allocation of primary risk types to each of these Committees is summarised in the table below.

Table 1 Allocation of primary risk types to Committees

Governance Committee	Primary Risk Type
Core Management Committee	Strategic Risk
	Reputational Risk
Credit Committee	Credit Risk
Non-Financial Risk Committee	Operational Risk
	Compliance Risk
	Conduct Risk
Assets and Liabilities Committee	Capital Risk
	Liquidity Risk
	Market Risk

*Product Governance Committee, and, Operations Committee, may also discuss and monitor secondary operational and conduct risk categories, however, NFRC retains ultimate accountability for monitoring operational and conduct risk at a primary risk level.

Risk Ownership

Each risk type identified is allocated a Risk Owner. Risk Owners are responsible for the management and reporting of their respective risks.

With support from the 2Line Risk Function where necessary, the Risk Owner is responsible for ensuring the:

- Identification of risks and design, and implementation and embedding of appropriate controls
- Development, maintenance, monitoring and reporting of risk appetite statements, measures and triggers
- Development, implementation and monitoring of compliance with risk specific policies and operating procedures, ensuring alignment to the relevant risk type frameworks and risk appetite
- Identification, assessment, escalation, management and monitoring of risk events
- Production of risk reports to support Governance Committee decision making and challenge of 1Line
- Development and execution of quality monitoring processes as required
- Embedding of risk management competencies and expected behaviours within their business areas

Policies and Procedures

Policies and procedures cascade from the RMF and are driven by the primary risk types. They are designed to provide sufficient coverage to direct the management and control of the Bank's risks.

The Policy Framework is designed to support the clarification of internal controls by defining minimum operating standards, limits, and expectations which the Bank must operate within, aligned to the Bank's risk appetite. Policies are approved by the relevant committees on a periodic basis or if material changes are required.

Risk Strategy

The Risk Strategy supports the Bank's mission and business objectives by clearly identifying the types of risk the business strategy raises for the Bank, together with how those risks will be effectively managed; the Risk Strategy therefore provides key linkage from business strategy to RMF coverage.

The Risk Strategy is owned by the CRO and is developed in parallel with the Bank's business strategy. Support in developing and reviewing the Risk Strategy is sought from the Bank's Board and Senior Management, with oversight provided by the ARC. The Risk Strategy, supported by high level Risk Appetite Statements, documents the desired risk management capability and approach for each of the Bank's Primary Risk types. Required risk management enhancements, generally or per individual risk type, e.g. in terms of available risk capacity, will also be documented to support progression towards the desired capability.

The Bank's overall objective in defining its risk strategy is to create an environment within which the Bank can pursue its mission within risk appetite in a sustainable, prudent way to its fullest extent, supported by an effective and efficient Risk Management Framework.

Risk Culture

Risk Culture is a sub-component of corporate culture and defined by the Basel Committee on Banking Supervisions (BCBS) as "norms, attitudes and behaviours related to risk awareness, risk-taking and management and controls that shape decisions on risks".

The Bank's Board and Senior Management are committed to establishing a positive risk intelligent culture, where everyone understands the approach to risk, takes personal responsibility to manage risk, and ensures fair customer outcomes in everything they do. Transparency of risk reporting and effective, open challenge is strongly encouraged which is in direct alignment with Triodos Bank values. Risk Culture is therefore a key component of the Bank's RMF.

Risk Appetite

The Bank defines Risk Appetite as "the aggregate level and types of risk Triodos Bank UK is willing to assume within its currently available risk capacity to achieve its strategic objectives and business plan".

The Risk Appetite documents the settings for effective management of risks identified that might endanger the Bank's strategic goals, and which the RMF needs to manage too. Risk Appetite is set for each Primary Risk by the Bank Board and is articulated through a mix of qualitative and quantitative statements and measures. In addition to the Primary Risks, a Risk Appetite Statement is also maintained for Climate Change risk.

Triodos Bank UK recognises the importance of understanding both the risks and opportunities arising from the changing climate. Over this year, Triodos Bank UK has considered the potential risks arising from climate change, including on our entire portfolio of loans and investments. Co-workers from teams across Triodos Bank have all collaborated to explore climate related risks. Whether the risks arise in the form of transition risk (risk relating to transitioning to sustainable sources of energy) or physical risk (risk of extreme weather impacting Triodos Bank UK's portfolio and assets), they have been considered and feed into the RMF. Further details of the way this risk has been considered, the conclusions Triodos Bank UK has come to and who has oversight over Climate Risk can be found in the Annual Report & Accounts (pages 16-17). As noted in the Annual Report & Accounts, whilst this is a risk we must manage, Triodos Bank UK welcomes the increasing regulatory and political focus on climate change as we continue to actively influence this global agenda with activity that remains aligned to our mission, purpose and values.

The Bank's Risk Appetite is reviewed on (at least) an annual basis and is set with full consideration to the Group Risk Appetite Statement. Each high-level Risk Appetite Statement is supported by a small set of critical KRIs.

Significant Risks

The Bank's principal risks and uncertainties as at the 31st December 2021 are set out in the Strategic Report on pages 10 to 15 of the Annual Report and Accounts 2021.

The Bank has identified 9 Principal Risk Types across three overarching risk categories which might adversely impact its ability to achieve its strategic objectives, and which are actively managed through the Bank's RMF.

The table below outlines the risk categories identified by the Bank.

Table 2 Risk categories

Risk Category	Primary Risk Type
Enterprise Risk	Strategic Risk
	Reputational Risk
	Capital Risk
Financial Risk	Credit Risk
	Liquidity Risk
	Market Risk
Non-Financial Risk	Operational Risk
	Compliance Risk
	Conduct Risk

Risk Statement

The Bank's risk statement represents the articulation of the Bank's risk appetite, is approved by the Board, and defines the level of risk that the Bank is prepared to accept to achieve its strategic objectives. The Bank operates within appetite tolerances and regularly reports against performance to the Board. The risk statement is included in Appendix A.

CAPITAL RESOURCE AND ADEQUACY

Overview

CRR sets out measures to protect financial markets and customers from the risk of banks failing by requiring banks to have sufficient capital to be able to absorb unexpected losses and remain financially resilient.

CRR requires banks to hold minimum capital amounts calculated by reference to its risk weighted assets (RWAs). RWA is a banking term used to classify assets and determine the minimum amount of capital that should be held based on the risk profile of the bank's assets.

CRR recognises three tiers of capital that can be held by a bank which are classified according to their quality and accessibility: Common Equity Tier 1 Capital (CET1), Additional Tier 1 Capital (AT1) and Tier 2 Capital. These are collectively known as 'own funds'. The Bank is required to hold own funds which are necessary to meet the requirements of Pillar 1.

The Bank is also subject to additional capital requirements known as Pillar 2, which are set by the PRA. The purpose of Pillar 2 capital requirements is to reflect specific risks that are not adequately covered by Pillar 1 and ensure that sufficient capital is held against those risks.

As of 31 December 2021, and throughout the period, the Bank complied with the capital requirements that were in force as set out by the PRA.

The Bank's regulatory capital as of 31 December 2021 consisted of CET1 Capital in the form of ordinary share capital and reserves with regulatory deductions, and Tier 2 capital representing subordinated debt. The Bank issued £5.69m of subordinated debt on 23 December 2020 with a maturity of 10 years. The full £5.69m is eligible as Tier 2 capital as at 31 December 2021. Article 437 of the CRR requires the Bank to disclose the main features of capital instruments. This is included in Appendix B. The Bank has no AT1 capital.

Total Capital Resources

The tables below show the total available capital resources of the Bank. The own funds disclosure is shown in Appendix C.

Table 3 Total capital resources

	31-Dec-21 £'000	31-Dec-20 £'000
Common Equity Tier 1 (CET1) capital		
Ordinary share capital	172,000	172,000
Retained earnings*	7,051	3,711
CET1 capital before regulatory adjustments**	179,051	175,711
Regulatory adjustments to CET1 capital		
Intangible assets***	(1,146)	(1,285)
Total regulatory adjustments to CET1 capital	(1,146)	(1,285)
CET1 capital	177,905	174,426
Tier 1 capital	177,905	174,426
Tier 2 capital		
Subordinated loan notes (unlisted)	5,695	5,695
Tier 2 capital	5,695	5,695
Total capital	183,600	180,121

* Retained earnings includes £55k merger reserve

** CET1 capital before regulatory adjustments agrees to equity and reserves in the Annual Report.

*** Intangible assets do not agree to audited Annual Report due to acceleration of CRR II measures resulting in non-deduction of certain software assets from CET1 capital

Table 4 RWAs and capital ratios

	31-Dec-21	31-Dec-20
Risk-weighted assets (£'000)	840,391	770,444
CET1 capital ratio (%)	21.2%	22.6%
Total capital ratio (%)	21.8%	23.4%

RWAs reduced substantially in 2020 due to beneficial impact of the implementation of the infrastructure factor and revised SME support factor under CRR II, with effect from 30/6/20. In 2021, RWAs rose substantially, largely as a result of growth in the loan portfolio.

Own Funds Balance Sheet Reconciliation

Article 437(1) of the CRR requires a full reconciliation of own funds to audited financial position in the Annual Report and Accounts. This should include all items that are components of, or are deducted from, regulatory own funds.

Table 5 Own funds balance sheet reconciliation

	£'000
Shareholders' funds per Bank statutory financial statements	186,893*
Subordinated debt included as Tier 2 capital	5,695
Regulatory adjustments to capital	(1,146)
Current period unaudited profit	(7,841)
Own funds at 31 December 2021	183,601

*Has been rounded up by £1000 in Annual Report and Accounts, which is reflected here as well

IFRS Impact

On 1 May 2019, the operations and all the assets and liabilities of the UK branch of Triodos Bank N.V., the Bank's immediate parent company and ultimate controlling party, were transferred to Triodos Bank UK via a transfer under Part VII of the Financial Services and Markets Act 2000.

All assets were transferred at their book value under Dutch GAAP and on conversion to IFRS a merger reserve was created. No consideration was paid for the transfer, because under Dutch GAAP the net book values of assets and liabilities transferred was £nil.

Upon conversion to IFRS the calculation of impairment provisions moved from an incurred loss model to an expected loss model as required by IFRS 9. This resulted in an increase in bad debt provisions of £425k which formed, along with other IFRS adjustments, the £55k merger reserve.

The Bank has chosen not to apply the transitional arrangements for IFRS 9 as specified in Article 473a. The Bank's own funds, capital and leverage ratios already reflect the full impact of IFRS 9.

Assessment of The Adequacy of Internal Capital

The Bank's capital resources and capital requirements use the CRD framework as implemented locally by the PRA.

The Bank's policy is to maintain a strong capital base to provide an adequate buffer in a severe stress scenario and thereby maintain investor, creditor, and market confidence; and to sustain the future development of the business. The impact of the level of capital on the shareholder's returns is also recognised and the Bank maintains a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a stronger capital position.

The Bank's approach to the measurement of capital adequacy is primarily based on monitoring and forecasting the relationship of the capital resources requirement determined by the regulator to available capital resources.

The bank supplements the regulators requirement by maintaining a buffer in excess of the regulatory requirement at all times.

As of 31 December 2021, the Bank has received a Total Capital Requirement (TCR) from the regulator of 14.62%. This is the aggregate of the Pillar 1 and current Pillar 2A capital requirements. The TCR has been improved slightly from 14.14% as a result of the PRA's CCyB offset (PS15/20).

A key input to the TCR-setting process is the Bank's Internal Capital Adequacy Assessment Process (ICAAP). In line with regulatory requirements set out in Supervisory Statement 31/15 'ICAAP and SREP', the Bank conducts its ICAAP assessment on an annual basis, or more frequently if there is a significant change in business strategy or operations.

The Board Risk Appetite Statement (RAS) is reviewed and approved at least annually by the Board. This articulates the Board's tolerances in relation to the level of risk that will be taken in pursuit of business objectives. In relation to capital and per the RAS, Capital Risk appetite is monitored through the following key metrics:

- Overall Capital Ratio (OCR)
- Common Equity Tier 1 Ratio (CET1)
- Leverage Ratio

These are aligned with the Recovery Plan (RP), with Early Warning Indicators (EWIs) and Invocation Trigger Points (ITPs).

Minimum Capital Requirement

The Bank has adopted the Standardised Approach to the calculation of credit risk. The operational risk requirement is calculated using the Basic Indicator Approach (BIA) and the three-year average of the Bank's total income.

The following table shows the Bank's minimum capital requirement by each RWA component using template EU OV1 as per the EBA guidelines (EBA/GL/2016/11).

Table 6 Overview of RWAs

	RWAs		Minimum capital requirements ¹
	31-Dec-21 £'000	31-Dec-20 £'000	31-Dec-21 £'000
1 Credit/counterparty risk	773,479	709,757	61,878
2 Of which Standardised Approach	773,479	709,757	61,878
19 Market risk	-	-	-
20 Of which Standardised Approach	-	-	-
23 Operational risk	65,153	59,395	5,212
24 Of which Basic Indicator Approach	65,153	59,395	5,212
27 Amounts below the thresholds for deduction (subject to 250% risk weight)	1,759	1,291	141
Total risk	840,391	770,444	67,231

Source: EU OV1

¹Minimum Capital is Pillar 1 at 8% of RWAs.

The following table shows the Bank's minimum capital requirements for each of the risk exposure classes.

Table 7 Overview of RWAs by exposure class

Exposure class	Risk-weighted assets		Minimum capital requirements ¹
	31-Dec-21 £'000	31-Dec-20 £'000	31-Dec-21 £'000
Credit/Counterparty risk	775,238	711,048	62,019
Central governments or central banks	-	-	-
Public sector entities	1,126	4,336	90
Multilateral development banks	-	-	-
Institutions	14,281	4,753	1,142
Corporates	322,090	302,570	25,767
Retail	45,620	46,005	3,650
Secured by mortgages on immovable property	316,133	282,424	25,291
Exposures in default	58,556	54,606	4,685
Covered bonds	1,001	1,001	80
Items associated with particularly high risk	90	-	7
Other items	16,341	15,353	1,307
Operational risk	65,153	59,395	5,212
Total	840,391	770,444	67,231

¹Minimum Capital is Pillar 1 at 8% of RWAs.

REGULATORY CAPITAL BUFFERS

Credit institutions are required to hold capital conservation buffers (CCoB) and counter-cyclical capital buffers (CCyB).

The CCoB is a buffer which is required to be held by all institutions under CRD IV. The CCoB is designed to ensure that firms build sufficient capital buffers outside of a period of stress so that these can be used to draw down against under a stressed period.

The CCyB is a country-specific buffer and is designed to be used as a macro-prudential tool, implemented in 'overheating' economies to ensure that financial institutions have additional capital in place to absorb potential losses.

Institutions are required to calculate an institution-specific counter-cyclical capital buffer as a weighted average of the counter-cyclical buffer rates that apply in the countries where the credit exposures are located. In the UK, parliament has delegated the role of setting the CCyB to the Financial Policy Committee (FPC). The FPC decided on the 9 March 2020, to reduce the CCyB to 0% with immediate effect to support lending to households and businesses through the pandemic. The FPC announced on the 11th March 2020 to maintain the 0% rate for at least 12 months, so that any subsequent increase would not take effect until March 2022 at the earliest.

Further disclosure of information in relation to the requirement for a countercyclical capital buffer in accordance with Article 440 of the CRR is included in Appendix D.

COUNTERPARTY CREDIT RISK

The Bank is exposed to Counterparty Credit Risk in the form of settlement risk which is the risk that the Bank is unable to meet its daily settlement obligations as a result of timing mismatches from security of payment systems.

Settlement risk is not a risk that the Bank considers material as a result of several safeguards the Bank has put in place. The Bank transacts with high quality counterparties which are on the Bank's authorised counterparty list. The minimum rating of a counterparty to which the Bank may have an exposure is AA-.

The Bank will lend a maximum of £25m to a single group of connected borrowers, with the exception of higher limits for banking counterparties and specified sovereigns.

CREDIT RISK

Credit risk is the risk of losses arising from a borrower or counterparty failing to meet its obligations as they fall due. The Bank is, by the nature of its activities, exposed to credit risk. Credit risk emanates from actual or implied contractual arrangements with individuals, corporates, financial institutions, public entities or sovereigns. Credit risk management supports the mission of the organization and protects the financial performance.

Credit risk policies are designed to achieve the Bank's mission and to protect the balance sheet and profit and loss in such a way that depositors and investors of the Bank maintain a fair return on a secure and sustainable investment. The Bank's Credit Risk Policy sets out the elements of the Credit Risk Management Framework and is reviewed every two years and after any relevant change in the governance or credit risk principles.

The Bank applies the Standardised Approach (SA) for calculating the regulatory requirement for credit risk. The Risk Weighted Asset (RWA) calculations relate to exposures in the loan book, the investment book and off-balance sheet items. The Bank has no derivative exposures and no securitisation exposures.

Impairment Losses on Loans and Advances

The Bank calculates impairment losses under IFRS 9 principles and in accordance with IFRS 9 categories:

- Stage 1: Assets that have not had a significant increase in credit risk since initial recognition
- Stage 2: Assets that have experienced a significant increase in credit risk since initial recognition but do not have objective evidence of impairment
- Stage 3: Assets that have objective evidence of impairment at the reporting date

The 'Impairment of Financial Assets' section (page 35) in the Annual Report & Accounts provides a detailed overview of the Bank's approach to identifying, assessing and managing impaired financial assets. It describes the Bank's approach to assessing the risk of default and calculating expected credit losses (ECL). It also defines key terms such as 'default' and 'past due'.

Note 26, 'Financial Risk Management' in the Annual Report & Accounts discloses a table which sets out information about the overdue status of loans and advances to corporate and retail customers in Stages 1, 2 and 3.

The table below shows the ageing of past-due exposures

Table 8 Ageing of past-due exposures

		31 December 2021					
		a	b	c	d	e	f

Maximum Exposure to Credit Risk

The table below shows template EU CRB-B the maximum exposure to credit risk for the components of the balance sheet.

The *Net value of the exposure* is calculated as: For on-balance-sheet items, the gross carrying value of exposure less allowances/impairments. For off-balance-sheet items, the gross carrying value of exposure less provisions.

The *Average net exposure over the period* is calculated as: the average of the net exposure values observed at the end of each quarter of the observation period.

Table 9 Total and average net amount of exposures

Credit risk exposures	31-Dec-21		31-Dec-20	
	Net value of exposures at the end of the period	Average net exposures over the period	Net value of exposures at the end of the period	Average net exposures over the period

Risk Concentrations

As per PRA methodology set out in PS17/15, credit concentration risk is defined as:

“the risk of losses arising as a result of concentrations of exposures due to imperfect diversification. This imperfect diversification can arise from the small size of a portfolio or a large number of exposures to specific obligors (single name concentration) or from imperfect diversification with respect to economic sectors or geographical regions.”

In line with guidance set out in ‘Statement of Policy - the PRA’s Methodologies for setting Pillar 2 capital’ the Bank has assessed concentration risk for the retail credit and wholesale credit portfolio. The portfolio assessment is conducted on three bases:

- Geographic concentration risk
- Sectoral concentration risk
- Single name concentration risk

Geographical and Counterparty Sectors

Table 11 Geographical and counterparty credit exposure

Source: Template EU CRB-D

The Bank also monitors concentration risk for the credit portfolio at a regional level and uses this breakdown as part of its internal credit risk assessment methodology for capital planning, including ICAAP.

Residual Maturity by Asset and Liability Class

The table below sets out the contractual maturities of the Bank's financial liabilities and assets.

Table 12 Residual maturity by asset and liability class

31 December 2021	On demand	Less than 3 months	3 months - 1 year	1 - 5 years	More than 5 years	Non-cash items	Total
	£'000	£'000	£'000	£'000	£'000	£'000	£'000
Financial assets							
Cash and cash equivalents	374,820	-	-	-	-	-	374,820
Loans and advances to credit institutions	40,978	1,199	-	-	-	-	42,177
Loans and advances to customers	5,140	16,387	66,455	322,869	721,280	-	1,132,132
Debt securities	-	9,609	10,185	202,487	46,755	-	269,035
Other assets	574	475	383	321	320	14,319	16,392
	421,512	27,671	77,023	525,677	768,355	14,319	1,834,556
Financial liability							
Deposits from credit institutions	12,535	458	1,452	7,098	6,356	-	27,899
Customer accounts	1,312,996	229,460	61,056	4,634	-	-	1,608,147
Debt issued	-	-	41	-	5,695	-	5,735
Lease liabilities	-	33	101	325	745	-	1,205
Other liabilities	2,628	511	1,004	337	199	-	4,678
	1,328,159	230,462	63,653	12,394	12,995	-	1,647,664

Exposure by Credit Quality Steps

The Bank uses Moody's and Fitch as External Credit Assessment Institutions (ECAIs) for counterparty exposures. The mappings between the external credit assessment institutions used by the Bank and the credit quality steps used to determine the risk-weight are detailed in the following table. Where no external rating is used in the risk-weighted asset calculation, the unrated credit quality step applies.

Table 13 Credit quality steps

	Fitch	Moody's
Step 1	AAA to AA-	Aaa to Aa3
Step 2	A+ to A-	A1 to A3
Step 3	BBB+ to BBB-	Baa1 to Baa3
Step 4	BB+ to BB-	Ba1 to Ba3
Step 5	B+ to B-	B1 to B3
Step 6	CCC+ and below	Caa1 and below

On 31 December 2021, the Bank had £81.4m gross carrying value exposures across the exposure classes listed below of which £15.3m had a credit assessment by a nominated ECAs:

- Institutions
- Covered bonds

Operational Risk

The Bank applies the Basic Indicator Approach (BIA) to quantify the capital requirement for operational risk under Pillar 1. Under this approach, 15% of the Bank's average operating income for the previous three years is used. Income is defined in CRR Article 316 as the sum of net interest income and non-interest income. An operational RWA is then calculated such that 8% of that RWA gives the Pillar 1 capital requirement.

Interest Rate Risk in The Banking Book (IRRBB)

The Bank is mainly exposed to interest rate risk where the Bank holds fixed rate assets and liabilities; when market rates change, the value of these items is affected because their rate remains fixed.

The Bank uses an internal capital model for IRRBB and the risk appetite is calculated based on the standard PV200 calculation.

A PV200 calculation assigns all balance sheet items to a "time bucket" based on the next interest re-pricing date (or maturity date if fixed) and discounts them back using a current market curve to assess its Present Value (PV0). The discount factors can then be adjusted to simulate an immediate parallel 200bps increase and a 200bps decrease in rates. The difference between the PV0 and the 2% shifts up and down indicate the Bank's sensitivity to interest rate movements from a value perspective.

The Bank's sensitivity to interest rate movements from an earnings perspective is disclosed in the Annual Report and Accounts note 26(c) (page 67).

LEVERAGE

The Bank calculates and monitors a leverage ratio as required by CRD IV. This measures the ratio of the capital resources to total assets.

The minimum leverage ratio has been set at 3% for the Bank in line with PRA rulebook section 2015/89 although the Bank notes that the full requirement does not apply as its retail deposits do not exceed GBP £50bn.

The Bank considers its ability to meet the above ratio as part of its core capital requirements. The risk of excessive leverage is the risk of significant mismatches between assets and obligations. The Bank currently maintains a very strong leverage ratio as shown in the table below. The risk of excessive leverage is not considered to be material to the Bank.

The ratio is calculated as Tier 1 capital/total assets (on and off-balance sheet) adjusted for capital deductions.

The Leverage ratio common disclosure is in Appendix E.

Table 14 Leverage ratio

	31-Dec-21	31-Dec-20
Leverage ratio	9.3%	10.1%

Table 15 Summary reconciliation of accounting assets and leverage ratio exposure

	31-Dec-21 £'000	31-Dec-20 £'000
1 Total assets per published financial statements	1,834,464	1,639,370
Adjustment for off-balance sheet items (i.e., conversion to credit equivalent amounts of off-		
6 balance sheet exposures)	76,793	89,652
7 Other adjustments	(1,055)	(952)
Leverage ratio exposure measure	1,910,203	1,728,069

ASSET ENCUMBRANCE

An asset is defined as encumbered if it has been pledged as collateral against an existing on or off-balance sheet liability and therefore is no longer available for disposal or as collateral to support liquidity or funding requirements of the Bank.

Until the end of May 2021, £550,000 was held as collateral for Mastercard transactions in an account at the US Bank and could be drawn on by Mastercard if the Bank failed to meet its obligations to settle its customers' Mastercard transactions. Since June 2021, this collateral has no longer been held as the requirement for it to be held had surpassed as certain controls had been met.

The Bank has no other assets pledged as collateral.

Table 16 Template A: Encumbered and unencumbered assets

	Carrying amount of encumbered assets 31-Dec-21 £'000	Carrying amount of unencumbered assets 31-Dec-21 £'000	Carrying amount of encumbered assets 31-Dec-20 £'000	Carrying amount of unencumbered assets 31-Dec-20 £'000
Encumbered assets				
Loans on demand	-	415,797	550	397,595
Debt securities	-	269,035	-	153,005
Loans and advances other than loans on demand	-	1,133,332	-	1,071,688
Other assets	-	16,392	-	16,863
Carrying amount of assets	-	1,834,556	550	1,639,151

The Bank of England Cash Ratio Deposit is held within 'other assets'.

LIQUIDITY COVERAGE RATIO

The Liquidity Coverage Ratio (LCR) is defined by the LCR Delegated Act (Commission Delegated Regulation (EU) 2015/61), which also sets out the eligibility criteria for High Quality Liquid Assets ("HQLA"), and the stressed parameters for inflows and outflows. Whilst CRR2 has made some amendments to the way these are calculated, none of the changes are material to Triodos Bank UK.

The aim of the LCR is to ensure that firms have sufficient liquid assets to withstand a short-term liquidity stress of 30 days by comparing the firm's HQLA holdings to its net stressed cash outflows.

The LCR is calculated as follows:

"Liquidity Buffer" / "Net Liquidity Outflows over a 30 calendar day stress period" = Liquidity Coverage Ratio (%)"

As of 31 December 2021, the Bank's LCR was at 413.6%. This is calculated as a total HQLA of £628.2m against net cash outflows of £151.9m.

The Bank monitors and reports the Liquidity Coverage Ratio (LCR) on an unconsolidated reporting basis. This is monitored in line with internal risk appetite thresholds set by the Board. The weighted average liquidity buffer (representing eligible High Quality Liquid Assets (HQLA)), 30-day net cash outflows and LCRs are shown in the table below. The averages are calculated over a 12-month period.

Table 17 Liquidity Coverage Ratio – Total Weighted Value (12-month average) for quarter ended

	31-Mar-21	30-Jun-21	30-Sep-21	31-Dec-21
Liquidity buffer (£'000)	439,455	490,778	532,048	564,433
Net outflows over 30 days (£'000)	81,552	95,913	113,434	122,494
Liquidity coverage ratio (%)	538.9%	511.7%	469.0%	460.8%

The ratio exceeded all internal and regulatory minimum values throughout the year.

REMUNERATION POLICY AND PRACTICES

These disclosures are made in accordance with Article 450 of the CRR. This statement sets out the disclosures as they apply to the Bank. The Bank is classified as a Level 3 Bank under the Remuneration Guidelines set out in the PRA Rulebook.

Remuneration Policy

As a wholly owned subsidiary of Triodos Bank N.V., the Bank is closely aligned to the existing mission and business strategy of Triodos Bank. As a global pioneer in sustainable banking, Triodos Bank supports projects that benefit people and the planet and believes that banking can be used as a powerful force for good. As a value led organisation, the International Remuneration & Nomination Policy (hereafter 'the Policy') is based on the principle of human dignity and aims to enhance social coherence within the organisation. The policy applies to all business units of Triodos Bank, which includes Triodos Bank UK. It applies to all co-workers with local interpretations at a country level to ensure compliance with local legislation and practices.

The key principles of the policy are:

Fair remuneration and social coherence

Remuneration within Triodos Bank aims to be gender neutral. Our view is that remuneration enables co-workers to earn a decent living and contribute to the organisation and society at large. Remuneration practices within the Bank needs to be within scope of what is expected in the financial sector, but at the same time maintain a relatively low ratio between the lower and higher level of salaries paid. Variable remuneration components are modest and discretionary and are not an incentive to favour the co-workers or the bank's own interest to the detriment of Triodos Bank's customers. This contributes to a strong sense of co-workers being jointly responsibly for realising the mission of Triodos Bank.

Risk mitigation and avoiding conflicts of interest

The Policy aims to encourage business practice that lies within the risk appetite of Triodos Bank. Triodos Bank chooses not to have bonuses (variable remuneration based on predetermined targets or achievements) as this can enhance a culture of taking unjustified risk. The Policy recognises fixed salaries and limited variable remuneration on a discretionary basis. Triodos Bank explicitly states that the remuneration policy does not negatively influence the ability of Triodos Bank to maintain a capital base.

The Policy is reviewed on an annual basis. The Group Director for Human Resources will assess the Policy in view of the values of Triodos Bank and the relevant regulations in the countries where Triodos Bank operates. At Group level, the Legal Department will monitor the legal developments and notify HR of any changes in regulation related to remuneration that need to be included in this Policy.

The Group Director of HR will present the reviewed Policy to the Group Executive Board, after consultation with the Group Director for Internal Audit, Group Director for Compliance and Group CRO. After approval, the Remuneration Committee is consulted, who recommend to the Group Supervisory Board to approve the remuneration Policy. Execution of the Policy is audited by Internal Audit on an annual basis.

Link Between Pay and Performance

There are two main elements of remuneration for co-workers:

Fixed remuneration

- Fixed salaries – the co-worker's salary is based on the position of the role in the Job Family Framework. A salary table operates in each country and is based on the Job Family Framework. Co-worker salary levels aim to be at the median level, with the same scale for men and women.
- Benefits (including pension and non-cash benefits such as healthcare).

Variable remuneration

- Token of appreciation (TOAs)– Triodos Bank believes linking performance to financial awards does not lead to desired results and behaviour. The TOAs can be individual or collective. Individuals are granted in retrospect for extraordinary achievements and cannot exceed one month's salary up to a maximum of €10,000 gross in one year. Collective TOAs may be paid for the overall achievements and contribution of all co-workers with a maximum €500 per year per co-worker. The TOAs are subject to clawback arrangements. The members of Triodos Bank's Executive Board are excluded from these awards.
- Severance payments – should be modest and follow local legislation or generally accepted norms. Severance payments to members of Triodos Bank's Executive Board do not exceed one year's salary

Triodos Bank does not offer bonus or share option schemes to either members of the Executive Board, the Supervisory Board, the Board of Stichting Administratiekantoor Aandelen Triodos Bank N.V (SAAT) nor to co-workers.

Local Application of International Remuneration & Nomination Policy

At a local level, the UK Board is responsible for remuneration policy and governance of all matters relating to remuneration within the Bank. The UK Remuneration Guidelines provide a local interpretation of core elements of the Policy with respect to fixed salaries and TOAs.

The total overall increase in the Bank's combined salaries is determined each year by the Head of HR, CFO and CEO, who have the necessary skills to exercise the appropriate judgement with regards to remuneration policy and practices. Remuneration of locally defined roles, CEO, Core Management Committee and Local heads, is approved according to the RACI responsibilities outlined in the Policy.

Quantitative Disclosures

This section provides details of the remuneration of Triodos Bank UK co-workers, including Material Risk Takers (MRTs) for the year ending 31 December 2021.

MRTs are those individuals whose professional activities have a material impact on the Bank's risk profile, based on the qualitative and quantitative criteria set by the European Banking Authority under Commission Delegated Regulation (EU) No 604/2014. MRTs are defined using the EBA Regulatory Technical Standard definition for remuneration purposes and for assessing the materiality of the impact a role would have on the risk profile of Triodos Bank UK. During the year there were a total of 27 MRTs. This list is maintained by Human Resources.

Those identified as MRTs include, but are not limited to:

- Executive and non-executive directors of the Bank
- Senior Management (being the other members of the Bank's Management Team, as listed in the Annual Report and Accounts)

- Other staff with key functional or managerial responsibility including senior managers of control functions such as audit and risk
- Other risk takers, whose professional activities could have a material impact on the Bank's risk profile

The Bank employed 253 co-workers at 31 December 2021 (2020: 208). A detailed breakdown of staff costs can be found in Note 5 of the Annual Report and Accounts. The table below provides a breakdown of staff costs for the Bank and MRTs. Fixed remuneration is defined as base salary and other benefits (such as pension and healthcare). Variable remuneration is defined as TOAs made in the financial period. The Bank operates in one material business unit – Business Banking.

Table 18 Remuneration

31 December 2021	All Material Risk Takers £'000	All staff £'000
Fixed remuneration		
Number of employees	27	253
Total fixed remuneration	2,198	11,070
Variable remuneration		
Number of employees	-	-
Total variable remuneration	-	-
Total remuneration	2,198	11,070

Figures shown above are the staff costs relating to the 27 co-workers identified during the year as MRTs, including any remuneration in the year received before or after they ceased to be MRT, and including starters and leavers.

Due to some teams having a small number of co-workers, a breakdown by business area or MRT function is not disclosed.

The Bank does not enter into sign-on agreements with new starters. During the year there was one severance payment relating to an MRT. No co-worker received variable or total remuneration in excess of £500,000.

Appendix A – Risk Management Disclosures

Risk Statement

Triodos Bank UK provides banking services and related financial services within the UK with the aim of enabling individuals, institutions and businesses to use money more consciously in ways that benefit people and the environment and promote sustainable development.

The Bank's strategy is based on that purpose, to be the ethical finance provider of choice in the UK market, delivered through a strategy to increase the impact of the organisation by serving more customers, with the products they want us to provide.

Underpinning this, the Bank sets a clear risk appetite to operate within and seeks to deliver best-in-class execution through highly engaged colleagues, working together to deliver its goals.

Risk Management Overview

Effective enterprise-wide risk management is a core component of our strategy and operations. We adopt a holistic, end to end view of risk, ensuring that the key risks arising from our activities are effectively identified, assessed and controlled. Our objective is to support the strategy of the Bank by thinking broadly about risks and managing them in an appropriate manner relative to the size and complexity of our business.

Risk Appetite

The Bank's risk appetite is shaped by the Board, which provides a clear articulation of the level and types of risk that the Bank is prepared to accept in order to achieve its desired strategic outcomes. It is expressed and embedded through a 'high-level' Risk Appetite Statement that is set on an annual basis by the Board with regular reviews to consider both internal and external market developments and through 'directional' limits for key factors that influence the target outcomes.

A clear risk appetite enables the Bank to understand potential links between different aspects of its risk profile. In this way, strategic decisions are made in the full context of those factors likely to be of interest to a range of stakeholders, enabling them to understand the Bank's current and future risk profile, how it benchmarks versus others and how it supports our strategic objectives.

Performance against risk appetite measures is monitored and reported to our Core Management Committee (CMC) on a monthly basis, and at each Board Audit and Risk Committee (ARC). Additionally, escalation processes are embedded to notify Senior Management and Board members of any risk appetite measures operating outside of approved thresholds. A qualitative overlay provides additional insight to both current performance and any emerging trends or issues. This enables the CMC and ARC members to both challenge and provide direction to ensure the Bank remains within the agreed risk appetite and support the achievement of its strategic goals.

The following table sets out the actual ratios for some of the key metrics monitored for risk and performance purposes in 2021.

Table 19 Summary of metrics

	31-Dec-21 £'000	31-Dec-20 £'000
Capital		
Common Equity Tier 1 (CET1)	177,905	174,426
Risk weighted assets	840,391	770,444
Common Equity Tier 1 ratio (%)	21.2%	22.6%
Additional CET1 buffer requirements as a percentage of RWA		
Capital conservation buffer requirement (%)	2.5%	2.5%
Countercyclical buffer requirement (%)	0%	0%
Basel III Leverage Ratio		
Total Basel III leverage ratio exposure measure	1,910,203	1,728,069
Basel III leverage ratio (%)	9.3%	10.1%
Liquidity Coverage Ratio¹		
Total HQLA	628,207	519,569
Total net cash outflow	151,875	125,480
LCR ratio (%)	413.6%	414.1%

¹LCR balances included above are as at 31 December and do not agree to balances included in the table disclosed in the Liquidity Coverage Ratio section which reports average LCR balances.

Appendix B – Capital Instruments' Main Features

The Bank is required to disclose the main features of its capital instruments per Article 437(1) of the CRR (Regulation (EU) No 575/2013).

The template should be completed for the categories: Common Equity Tier 1 instruments, Additional Tier 1 instruments and Tier 2 instruments. The Bank has Common Equity Tier 1 instruments and Tier 2 instruments.

Capital instruments' main features template

		CET1	Tier 2
1	Issuer	Triodos Bank UK Ltd	Triodos Bank UK Ltd
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	Private placement	Public offer (on Triodos Bank UK Ltd Crowdfunding Platform)
3	Governing law(s) of the instrument	English law	English law
	Regulatory Treatment		
4	Transitional CRR rules	CET1	Tier 2
5	Post-transitional CRR rules	CET1	Tier 2
6	Eligible at solo/(sub-)consolidated/solo & (sub-)consolidated	Solo	Solo
7	Instrument type (types to be specified by each jurisdiction)	Common equity	Dated fixed rate subordinated note
8	Amount recognised in regulatory capital (currency in million, as of most recent reporting date)	£172,000,000	£5,694,800
9	Nominal amount of instrument	£1	£5,694,800
9a	Issue price	£1	£5,694,800 (100%)
9b	Redemption price	Not applicable	£5,694,800
10	Accounting classification	Shareholders' equity	Liability and amortised cost
11	Original date of issuance	1,000 'Ordinary' Class 23 May 2018 5,000,000 'Ordinary' Class 21 January 2019 166,999,000 'Ordinary' Class 30 April 2019	£5,694,800 23 December 2020
12	Perpetual or dated	Perpetual	Dated
13	Original maturity date	Not applicable	18 September 2030
14	Issuer call subject to prior supervisory approval	No	Yes
15	Optional call date, contingent call dates and redemption amount	Not applicable	18 September 2025
16	Subsequent call dates, if applicable	Not applicable	Not applicable
	Coupons/dividends		
17	Fixed or floating dividend/coupon	Floating	Fixed
18	Coupon rate and any related index	Not applicable	4% On fifth anniversary (and if not called), the interest rate is reset and fixed at 3.9% above the prevailing base rate at that time and will apply for the remainder of the term.
19	Existence of dividend stopper	No	No
20a	Fully discretionary, partial discretionary or mandatory (in terms of timing)	Fully discretionary	Mandatory
20b	Fully discretionary, partial discretionary or mandatory (in terms of amount)	Fully discretionary	Mandatory
21	Existence of step up or other incentive to redeem	No	No
22	Non-cumulative or cumulative	Non-cumulative	Non-cumulative
23	Convertible or non-convertible	Non-convertible	Convertible (only at regulator's discretion)
24	If convertible, conversion trigger(s)	Not applicable	Pre-emptive action by regulator to avoid insolvency
25	If convertible, fully or partial	Not applicable	Fully
26	If convertible, conversion rate	Not applicable	Not applicable
27	If convertible, mandatory or optional conversion	Not applicable	Mandatory
28	If convertible, specify instrument type convertible into	Not applicable	Shares
29	If convertible, specify issuer of instrument it converts into	Not applicable	Triodos Bank UK Ltd
30	Write-down features	No	No

31	If write-down, write-down trigger(s)	Not applicable	Not applicable
32	If write-down, full or partial	Not applicable	Not applicable
33	If write-down, permanent or temporary	Not applicable	Not applicable
34	If temporary write-down, description of write-up mechanism	Not applicable	Not applicable
35	Position in subordination hierachy in liquidation (specify instrument type immediately senior to instrument)	All subordinated notes	All other liabilities
36	Non-compliant transitioned features	No	No
37	If yes, specify non-compliant features	Not applicable	Not applicable

Appendix C – Own Funds Disclosure

The following own funds disclosure aims to reflect the detailed capital position of the Bank. The Bank is required to disclose the specific items on own funds described in points (d) and (e) of Article 437 (1) of Regulation (EU) No 575/2013.

	Applicable amount 31-Dec-21 £'000	
Common Equity Tier 1: (CET1) capital: instruments and reserves		
1	Capital instruments and the related share premium accounts	172,000
	of which: Ordinary Shares	172,000
	of which: Instrument type 2	-
	of which: instrument type 3	-
2	Retained earnings	7,051
3	Accumulated other comprehensive income (and other reserves)	-
3a	Funds for general banking risk	-
4	Amount of qualifying items referred to in Article 484 (3) and the related share premium accounts subject to phase out from CET1	-
5	Minority interests (amount allowed in consolidated CET1)	-
5a	Independently reviewed interim profits net of any foreseeable charge or dividend	-
6	Common Equity Tier 1 (CET1) capital before regulatory adjustments (sum of rows 1 to 5a)	179,051
Common Equity Tier 1 (CET1) capital: regulatory adjustments		
7	Additional value adjustments	-
8	Intangible assets (net of related tax liability)	(1,146)
9	Empty set in the EU	-
10	Deferred tax assets that rely on future profitability excluding those arising from temporary differences (net of related tax liability where the conditions in Article (38) are met)	-
11	Fair value reserves related to gains or losses on cash flow hedges	-
12	Negative amounts resulting from the calculation of expected loss amounts	-
13	Any increase in equity that results from securitised assets	-
14	Gains or losses on liabilities valued at fair value resulting from changes in own credit standing	-
15	Defined-benefit pension fund assets	-
16	Direct and indirect holdings by an institution of own CET1 instruments	-
17	Direct, indirect and synthetic holdings of the CET 1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution	-
18	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10 % threshold and net of eligible short positions)	-
19	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities (amount above 10% threshold and net of eligible short positions)	-
20	Empty set in the EU	-
20a	Exposure amount of the following items which qualify for a RW of 1250%, where the institution opts for the deduction alternative	-
20b	of which: qualifying holdings outside the financial sector	-
20c	of which: securitisation positions	-
20d	of which: free deliveries	-
21	Deferred tax assets arising from temporary differences (amount above 10% threshold, net of related tax liability where the conditions in Article 38 (3) are met)	-
22	Amount exceeding the 15% threshold	-
23	of which: direct and indirect holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities	-
24	Empty set in the EU	-
25	of which: deferred tax assets arising from temporary differences	-
25a	Losses for the current financial year	-

26a	Foreseeable tax charges relating to CET1 items	-
27	Qualifying AT1 deductions that exceed the AT1 capital of the institution	-
28	Total regulatory adjustments to Common Equity Tier 1 (CET1) (sum of rows 7 to 20a, 21, 22 and 25a to 27)	(1,146)
29	Common Equity Tier 1 (CET1) capital (row 6 minus row 28)	177,905
Additional Tier 1 (AT1) capital: instruments		
30	Capital instruments and the related share premium accounts	-
31	of which: classified as equity under applicable accounting standards	-
32	of which: classified as liabilities under applicable accounting standards	-
33	Amount of qualifying items referred to in Article 484 (4) and the related share premium accounts subject to phase out from AT1	-
34	Qualifying Tier 1 capital included in consolidated AT1 capital (including minority interests not included in row 5) issued by subsidiaries and held by third parties	-
35	of which: instruments issued by subsidiaries subject to phase out	-
36	Additional Tier 1 (AT1) capital before regulatory adjustments (sum of rows 30, 33 and 34)	-
Additional Tier 1 (AT1) capital: regulatory adjustments		
37	Direct and indirect holdings by an institution of own AT1 instruments	-
38	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution	-
39	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions)	-
40	Direct, indirect and synthetic holdings by the institution of the AT1 instruments of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions)	-
41	Empty set in the EU	-
42	Qualifying T2 deductions that exceed the T2 capital of the institution	-
43	Total regulatory adjustments to Additional Tier 1 (AT1) capital (sum of rows 37 to 42)	-
44	Additional Tier 1 (AT1) capital (row 36 minus 43)	-
45	Tier 1 capital (T1 = CET1 + AT1) (sum of row 29 and row 44)	177,905
Tier 2 (T2) capital: instruments and provisions		
46	Capital instruments and the related share premium accounts	5,695
47	Amount of qualifying items referred to in Article 484 (5) and the related share premium accounts subject to phase out from T2	-
48	Qualifying own funds instruments included in consolidated T2 capital (including minority interests and AT1 instruments not included in rows 5 or 34) issued by subsidiaries and held by third parties	-
49	of which: instruments issued by subsidiaries subject to phase out	-
50	Credit risk adjustments	-
51	Tier 2 (T2) capital before regulatory adjustments	5,695
Tier 2 (T2) capital: regulatory adjustments		
52	Direct and indirect holdings by an institution of own T2 instruments and subordinated loans	-
53	Holdings of the T2 instruments and subordinated loans of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution	-
54	Direct and indirect holdings of the T2 instruments and subordinated loans of financial sector entities where the Institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions)	-
55	Direct and indirect holdings by the institution of the T2 instruments and subordinated loans of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions)	-
56	Empty set in the EU	-
57	Total regulatory adjustments to Tier 2 (T2) capital (sum of rows 52 to 56)	-
58	Tier 2 (T2) capital (row 51 minus row 57)	5,695

59	Total capital (TC = T1 + T2) (sum of row 45 and row 58)	183,600
60	Total risk weighted assets	840,391
Capital ratios and buffers		
61	Common Equity Tier 1 (as a percentage of total risk exposure amount)	21.2%
62	Tier 1 (as a percentage of total risk exposure amount)	21.2%
63	Total capital (as a percentage of total risk exposure amount)	21.8%
64	Institution specific buffer requirement (CET1 requirement in accordance with article 92 (1) (a) plus capital conservation and countercyclical buffer requirements, plus systemic risk buffer, plus systemically important institution buffer expressed as a percentage of risk exposure amount)	-
65	of which: capital conservation buffer requirement	2.5%
66	of which: countercyclical buffer requirement	-
67	of which: systemic risk buffer requirement	-
67a	of which: Global Systemically Important Institution (G-SII) or Other Systemically Important Institution (O-SII) buffer	-
68	Common Equity Tier 1 available to meet buffers (as a percentage of risk exposure amount)	16.7%
69	[non relevant in EU regulation]	-
70	[non relevant in EU regulation]	-
71	[non relevant in EU regulation]	-
Amounts below the thresholds for deduction (before risk weighting)		
72	Direct and indirect holdings of the capital of financial sector entities where the institution does not have a significant investment in those entities (amounts below 10% threshold and net of eligible short positions)	17,790
73	Direct and indirect holdings by the institution of the CET1 Instruments of financial sector entities where the institution has a significant investment in those entities (amount below 10% threshold and net of eligible short positions)	-
74	Empty set in the EU	-
75	Deferred tax assets arising from temporary differences (amounts below 10% threshold, net of related tax liability where the conditions in Article 38 (3) are met)	-
Applicable caps on the inclusion of provisions in Tier 2		
76	Credit risk adjustments included in T2 in respect of exposures subject to standardised approach (prior to the application of the cap)	-
77	Cap on inclusion of credit risk adjustments in T2 under standardised approach	-
78	Credit risk adjustments included in T2 in respect of exposures subject to internal ratings-based approach (prior to the application of the cap)	-
79	Cap for inclusion of credit risk adjustments in T2 under internal ratings-based approach	-
Capital instruments subject to phase-out arrangements (only applicable between 1 Jan 2014 and 1 Jan 2022)		
80	— Current cap on CET1 instruments subject to phase out arrangements	-
81	— Amount excluded from CET1 due to cap (excess over cap after redemptions and maturities)	-
82	— Current cap on AT1 instruments subject to phase out arrangements	-
83	— Amount excluded from AT1 due to cap (excess over cap after redemptions and maturities)	-
84	— Current cap on T2 instruments subject to phase out arrangements	-
85	— Amount excluded from T2 due to cap (excess over cap after redemptions and maturities)	-

Appendix D – Disclosure in Relation To The Requirement for a Countercyclical Capital Buffer

Table 20 – Geographical distribution of credit exposures relevant for the calculation of the countercyclical capital buffer

	General credit exposures		Trading book exposures		Securitisation exposures		Own funds requirements			Own funds requirements weights	Countercyclical buffer rate	
	Exposure value for SA	Exposure value IRB	Sum of long and short position of trading book	Value of trading book exposure for internal models	Exposure value for SA	Exposure value IRB	Of which: general credit exposures	Of which: trading book exposures	Of which: securitisation exposures

Table 21 - Amount of institution-specific countercyclical capital buffer

	31-Dec-21
Total risk exposure amount (£'000)	840,391
Institution specific countercyclical capital buffer rate (%)	0.0%
Institution specific countercyclical capital buffer requirement (£'000)	-

Appendix E – Leverage Ratio Common Disclosure

	31-Dec-21 £'000	
On-balance sheet exposures (excluding derivatives and SFTs)		
1	On-balance sheet items (excluding derivatives, SFTs and fiduciary assets, but including collateral)	1,834,556
2	Asset amounts deducted in determining Tier 1 capital	(1,146)
3	Total on-balance sheet exposures (excluding derivatives, SFTs and fiduciary assets, but including collateral) (sum of lines 1 and 2)	1,833,410
Derivative exposures		
4	Replacement cost associated with derivative transactions (i.e. net of eligible cash variation margin)	-
5	Add-on amounts for PFE associated with derivatives transactions (mark-to-market method)	-
EU-5a	Exposures determined under Original Exposure Method	-
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the applicable accounting framework	-
7	Deductions of receivable assets for cash variation margin provided in derivatives transactions	-
8	Exempted CCP leg of client-cleared trade exposures	-
9	Adjusted effective notional amount of written client derivatives	-
10	Adjusted effective notional offsets and add-on deductions for written client derivatives	-
11	Total derivative exposures (sum of lines 4 to 10)	-
SFT exposures		
12	Gross SFT assets (with no recognition of netting), after adjusting for sales accounting transactions	-
13	Netted amounts of cash payables and cash receivables of gross SFT assets	-
14	Counterparty credit risk exposure for SFT assets	-
EU-14a	Derogation for SFTs: Counterparty credit risk exposure in accordance with Articles 429b(4) and 222 of Regulation (EU) No 575/2013	-
15	Agent transaction exposures	-
EU-15a	Exempted CCP leg of client-cleared SFT exposures	-
16	Total securities financing transaction exposures (sum of lines 12 to 15a)	-
Off-balance sheet exposures		
17	Off-balance sheet exposures at gross notional amount	156,483
18	Adjustments for conversion to credit equivalent amounts	(79,690)
19	Other off-balance sheet exposures (sum of lines 17 to 18)	76,793
Exempted exposures in accordance with Article 429(7) and (14) of Regulation (EU) No 575/2013		
EU-19a	Intragroup exposures (solo basis) exempted in accordance with Article 429(7) of Regulation (EU) No 575/2013	-
EU-19b	Exposures exempted in accordance with Article 429(14) of Regulation (EU) No 575/2013 (on and off balance sheet)	-
Capital and total exposure measure		
20	Tier 1 capital	177,905
21	Leverage ratio total exposure measure (sum of lines 3, 11, 16, 19, EU19a and EU19b)	1,910,203
22	End of quarter leverage ratio	9.3%
Choice of transitional arrangements and amount of derecognised fiduciary items		
EU-23	Choice on transitional arrangements for the definition of the capital measure	Fully phased in
EU-24	Amount of derecognised fiduciary items in accordance with Article 429(11) of Regulation (EU) No 575/2013	-
